User-Centred Energy Systems

About Us

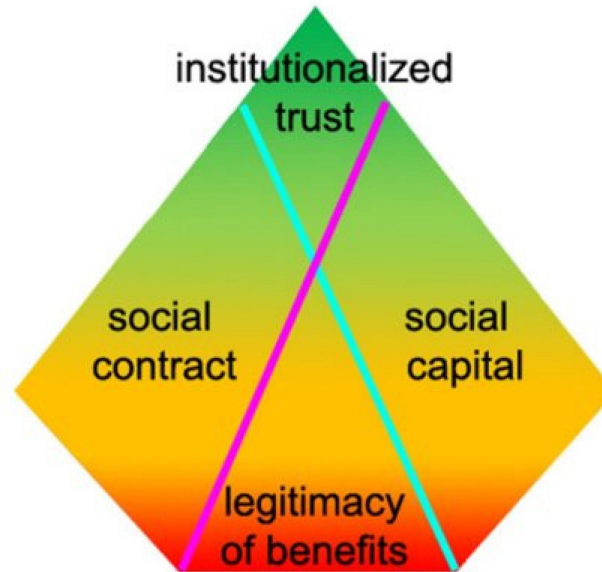

The User-Centred Energy Systems mission is to provide evidence from socio-technical research on the design, social acceptance and usability of clean energy technologies to inform policy making for clean, efficient and secure energy transitions.

- Task of the IEA Users TCP.
- The Annex was launched in October 2019 and now concluded (October 2021).
- The participating countries are Australia (operating agents), Austria, the Netherlands, Norway, Sweden, and Switzerland.
- Swiss academic coordinators: Dr. Selin Yilmaz (UNIGE) and Dr. Christian Winzer (ZHAW)

The concept of a 'social license'

PSYCHOLOGICAL IDENTIFICATION

---- full trust ----

APPROVAL

--- credibility ---

ACCEPTANCE

--- legitimacy ---

**WITHHELD/
WITHDRAWN**

© Reference: Boutilier, R. G., Black, L., & Thomson, I. 2012. From metaphor to management tool: How the social license to operate can stabilise the socio-political environment for business

Aim of Task

To understand and find evidence:

- what social and practioner variables are there
- how trust between people and industry is built and maintained across different contexts

to achieve Social License to Automate

Our team & work

Social
License to
Automate

Social License to Automate

Emerging Approaches to
Demand Side Management

Expert research groups in **six** countries
26 cases: feasibility, trial, demonstration and
mature automation projects with over **6000**
participants in surveys, interviews and active
case feedback.

Social License to Automate Switzerland country profile report (60 [pages](#))

Outlook: Social License to Automate V2

- Early adopters (PV & EV owners, already a community member), mostly men,
- Casts doubts on issues such as equity, gender balance, inclusiveness therefore the scalability of the projects.
- Community engagement is complete another story!

Follow-up (Version 2):

- Gender, diversity factors in motivations
- Roles of cooperatives, communities (links with P2P) in Social License.

Thank you very much!
