

# Digital energy data

DSO Outlook

SWEET Conference 2023  
Sept. 6th, 2023

# Data based governance?

Data is the key enabler of electrification

Current counter-exemple :

- On one hand consistency of technology choices depends on location-related data
- On the other subsidies programs are independent of the location

- Maintain data privacy at any time whatever the purpose (even for research)
- Purposes for which sensitive personal data must be used are strictly regulated
- WEB 3rd generation technologies as an enabler for leveraging sensitive data without endangering it
- Pseudonymized Digital Twin processing actual load profiles at their right grid connection
- Open Data service providing cleaned, synthetized and reliable data to all stakeholders

# Thank you for your attention
