Advance Notification of Expected Transfer of Nuclear Material out of Switzerland

This is to notify the International Atomic Energy Agency that an international transfer of nuclear material subject to safeguards will be made out of Switzerland

To be filled out by the Safeguards responsible of the Material Balance Area (MBA) concerned.

a) Quantity of nuclear material: _____ g/kg total weight of element _____
 _____ g fissile isotope(s), if applicable

Chemical composition:

b) Physical form: _____
 Enrichment or isotopic composition, if applicable: _____

c) Approximate number of items: _____

d) Description (type) of containers, if available: _____

e) State and, if known, place of destination: _____

f) Means of transport: _____

g) Date when and material balance area (location) where material is to be prepared for shipping and can be identified and its quantity and composition verified: _____

h) Likely date(s) of dispatch:
 Expected arrival date(s) at destination: _____

i) Point where recipient State will assume responsibility: _____

j) Expected (approximate) date on which recipient State will assume responsibility: _____

Responsible: _____ Date: _____ Signature: _____

Swiss Federal Office of Energy
 Safeguards Section

Date: _____ Signature: _____
