## STAKEHOLDERS INVOLVED IN THE SECTORAL PLAN PROCEDURE

Stakeholders involved in site selection procedure

A variety of stakeholders are involved in the disposal of radioactive waste. The duties of the authorities and the producers of radioactive waste are clearly divided. Those responsible for the disposal of radioactive waste from their facilities must dispose of it safely at their own cost. For this purpose they established the National Cooperative for the Disposal of Radioactive Waste (Nagra). The federal government is responsible for specifying the

legal framework and is the supervisory and the licensing authority. The Swiss Federal Office of Energy (SFOE) is the authority responsible for implementing the sectoral plan procedure and is supported by various other authorities and stakeholders. The terms and abbreviations used in the sectoral plan are defined in the document entitled «Glossar radioaktive Abfälle» (in German only). The various bodies (committees, commissions, etc.) are described in the document entitled «Aufgaben und Mitglieder des SGT» (in German only).

<sup>1</sup> Regional conferences were established at the beginning of stage 2 in the following regions: Jura Ost, Nördlich Lägern, Jura-Südfuss, Südranden (website closed down following publication of expert report by the Federal Nuclear Safety Inspectorate), Wellenberg and Zürich Nordost.
