

# IEA Bioenergy

Sandra Hermle

- **Aim of TCP: Achieve a substantial bioenergy contribution to future global energy demands by accelerating the production and use of environmentally sound, socially accepted and cost-competitive bioenergy**
- **24 members (23 countries, EC); Collaboration/Information exchange with IRENA, Biomass Future Platform, Mission Innovation, GBEP, FAO, SE4All/Below50, IEA AMF, IEA Combustion**
- **Topics:**
  - **Biomass combustion and Co-firing (Task 32)**
  - **Gasification of Biomass and Waste (Task 33)**
  - **Direct Thermochemical Liquefaction (Task 34)**
  - **Integrating Energy Recovery into Solid Waste Management Systems (Task 36)**
  - **Energy from Biogas (Task 37)**
  - **Climate Change Effects of Biomass and Bioenergy Systems (Task 38)**
  - **Commercialising Conventional and Advanced Liquid Biofuels from Biomass (Task 39)**
  - **Sustainable biomass markets and international bioenergy trade to support the biobased economy (Task 40)**
  - **Biorefining in a future BioEconomy (Task 42)**
  - **Biomass Feedstocks for Energy Markets (Task 43)**
